## Letter of recommendation

Hereby we would like to acknowledge that Intlabs company (Akademia Wirtualizacji) provided a complex training and consulting solution related with Public Compute Cloud – Amazon Web Services for employees of Applandeo on 10.-12.01.2015.

The training was conducted in the form of lectures combined with practical workshops using the Amazon Web Services environment.

In terms of consulting services Intlabs successfully completed an implementation and migration project based on AWS.

We would like to emphasize high level of knowledge and wide experience of the trainer, and a very professional preparation both to the training and consulting meetings.

Therefore we recommend Intlabs as a professional provider of Amazon Web Services trainings and consultancy.
