References for Intlabs

Hereby we would like to acknowledge that Intlabs company provided a dedicated training through Academy of Virtualization: "Public Compute Cloud – Amazon Web Services" for employees of Pro4People in the company office.

The training was conducted partially as a theoretical lecture and partially as a practical workshop on Amazon environment. The training conducted by Intlabs was prepared in a very professional manner with high focus on our needs and requirements. We were able to cover all required and raised topics. Moreover we would like to highlight that Intlabs trainer presented a very high level of knowledge and expertise in the Amazon Web Services field.

We are fully satisfied with this training, materials and the level of knowledge of the trainer who was able to advise us on the solution and architecture of the system.

A handwritten signature in blue ink that reads "Tomasz Pałk".
